The first of these is the fact that the
 English language is a very young one
 and has not yet reached its full development.
 It is still in the process of growth and
 change, and its vocabulary is constantly
 expanding.

The second fact is that the English
 language is a very flexible one. It is
 able to adapt itself to new situations and
 to new ideas. This is one of the reasons
 why it has become the most widely
 spoken language in the world.

The third fact is that the English
 language is a very expressive one. It
 has a rich vocabulary and a wide range
 of idioms. This is one of the reasons
 why it is so popular and so widely
 understood.
